Intelligent Data Warehousing: From Data Preparation to Data Mining Zhengxin Chen

Effective decision support systems (DSS) are quickly becoming key to businesses gaining a competitive advantage, and the effectiveness of these systems depends on the ability to construct, maintain, and extract information from data warehouses. While many still perceive data warehousing as a subdiscipline of management information systems (MIS), in fact many of its advances have and will continue to come from the computer science arena.

Intelligent Data Warehousing presents the state of the art in data warehousing research and practice from a perspective that integrates business applications and computer science. It brings the intelligent techniques associated with artificial intelligence (AI) to the entire process of data warehousing, including data preparation, storage, and mining. Part I provides an overview of the main ideas and fundamentals of data mining, artificial intelligence, business intelligence, and data warehousing. Part II presents core materials on data warehousing, and Part III explores data analysis and knowledge discovery in the data warehousing environment, including how to perform intelligent data analysis and the discovery of influential association patterns.

Bridging the gap between theoretical research and business applications, this book summarizes the main ideas behind recent research developments rather than setting forth technical details, and it presents case studies that show the how-to's of implementing these ideas. The result is a practical, first-of-its-kind book that brings together scattered research, unites MIS with computer science, and melds intelligent techniques with data warehousing.

From reader reviews:

Raymond Blalock:

Have you spare time for the day? What do you do when you have considerably more or little spare time? Sure, you can choose the suitable activity intended for spend your time. Any person spent their very own spare time to take a move, shopping, or went to the actual Mall. How about open or even read a book allowed Intelligent Data Warehousing: From Data Preparation to Data Mining? Maybe it is to be best activity for you. You understand beside you can spend your time together with your favorite's book, you can better than before. Do you agree with it has the opinion or you have other opinion?

Benjamin Manno:

The knowledge that you get from Intelligent Data Warehousing: From Data Preparation to Data Mining is a more deep you looking the information that hide in the words the more you get thinking about reading it. It doesn't mean that this book is hard to be aware of but Intelligent Data Warehousing: From Data Preparation to Data Mining giving you thrill feeling of reading. The author conveys their point in certain way that can be understood by means of anyone who read the idea because the author of this e-book is well-known enough. This specific book also makes your current vocabulary increase well. Therefore it is easy to understand then can go to you, both in printed or e-book style are available. We advise you for having that Intelligent Data Warehousing: From Data Preparation to Data Mining instantly.

Sarah Winship:

Reading a book being new life style in this yr; every people loves to go through a book. When you study a book you can get a lot of benefit. When you read textbooks, you can improve your knowledge, mainly because book has a lot of information in it. The information that you will get depend on what forms of book that you have read. If you wish to get information about your examine, you can read education books, but if you act like you want to entertain yourself you can read a fiction books, these us novel, comics, in addition to soon. The Intelligent Data Warehousing: From Data Preparation to Data Mining will give you new experience in looking at a book.

Norman Duque:

As a pupil exactly feel bored to help reading. If their teacher expected them to go to the library in order to make summary for some e-book, they are complained. Just very little students that has reading's soul or real their passion. They just do what the instructor want, like asked to the library. They go to at this time there but nothing reading very seriously. Any students feel that reading through is not important, boring in addition to can't see colorful pictures on there. Yeah, it is for being complicated. Book is very important for you. As we know that on this era, many ways to get whatever we really wish for. Likewise word says, many ways to reach Chinese's country. Therefore , this Intelligent Data Warehousing: From Data Preparation to Data Mining can make you truly feel more interested to read.
