## **Equipment Planning for TPM (Total Productive Maintenance Series)** Fumio Goto, Fumio Gotoh

This practical book for design engineers, maintenance technicians, and manufacturing managers details a systematic approach to the improvement of equipment development and design and product manufacturing. The author analyzes five basic conditions for factory equipment of the future: development, reliability, economics, availability, and maintainability. The book's revolutionary concepts of equipment design and development enables managers to reduce equipment development time, balance maintenance and equipment planning and improvement, and improve quality production equipment.
