Lyle's Administration of the College Library Caroline M. Coughlin, Alice Gertzog

Created in response to requests from library science faculty for a student edition with a focus on the planning and policy issues germane to all academic libraries, this new text is a revised and abridged version of the fifth edition of Lyle's Administration of the College Library. The ten chapters that form the text edition include six chapters essentially unchanged from the 1992 work_ Contexts of the American College Library, Evolution of Higher Education in the United States, Growth of Academic Librarianship, Campus Context, Legal Status, Governance and Politics, and Organization of the Library. Four reconfigured chapters address questions of policy formulation and leadership in the areas of user services, library staff, planning, and evaluation. The material in these chapters comes from thirteen chapters in the fifth edition, supplemented by recent research. The goal is to offer students a framework for learning about academic libraries in the context of higher education's learning goals and the value of quality library service and staff.
