Materials, Design and Manufacturing for Lightweight Vehicles (Woodhead Publishing Series in Composites Science and Engineering)

Materials, Design and Manufacturing for Lightweight Vehicles (Woodhead Publishing Series in Composites Science and Engineering)

Research into the manufacture of lightweight automobiles is driven by the need to reduce fuel consumption to preserve dwindling hydrocarbon resources without compromising other attributes such as safety, performance, recyclability and cost. Materials, design and manufacturing for lightweight vehicles will make it easier for engineers to not only learn about the materials being considered for lightweight automobiles, but also to compare their characteristics and properties.

Part one discusses materials for lightweight automotive structures with chapters on advanced steels for lightweight automotive structures, aluminium alloys, magnesium alloys for lightweight powertrains and automotive structures, thermoplastics and thermoplastic matrix composites and thermoset matrix composites for lightweight automotive structures. Part two reviews manufacturing and design of lightweight automotive structures covering topics such as manufacturing processes for light alloys, joining for lightweight vehicles, recycling and lifecycle issues and crashworthiness design for lightweight vehicles.

With its distinguished editor and renowned team of contributors, Materials, design and manufacturing for lightweight vehicles is a standard reference for practicing engineers involved in the design and material selection for motor vehicle bodies and components as well as material scientists, environmental scientists, policy makers, car companies and automotive component manufacturers.

- Provides a comprehensive analysis of the materials being used for the manufacture of lightweight vehicles whilst comparing characteristics and properties
- Examines crashworthiness design issues for lightweight vehicles and further emphasises the development of lightweight vehicles without compromising safety considerations and performance
- Explores the manufacturing process for light alloys including metal forming processes for automotive applications

From reader reviews:

Hazel Mishler:

In this 21st hundred years, people become competitive in every way. By being competitive right now, people have do something to make these people survives, being in the middle of the crowded place and notice by surrounding. One thing that sometimes many people have underestimated the item for a while is reading. Yep, by reading a publication your ability to survive increase then having chance to stand up than other is high. For you personally who want to start reading any book, we give you that Materials, Design and Manufacturing for Lightweight Vehicles (Woodhead Publishing Series in Composites Science and Engineering) book as nice and daily reading guide. Why, because this book is usually more than just a book.

Wanda Leopard:

Here thing why this specific Materials, Design and Manufacturing for Lightweight Vehicles (Woodhead Publishing Series in Composites Science and Engineering) are different and reputable to be yours. First of all studying a book is good but it depends in the content of the usb ports which is the content is as tasty as food or not. Materials, Design and Manufacturing for Lightweight Vehicles (Woodhead Publishing Series in Composites Science and Engineering) giving you information deeper as different ways, you can find any guide out there but there is no publication that similar with Materials, Design and Manufacturing for Lightweight Vehicles (Woodhead Publishing Series in Composites Science and Engineering). It gives you thrill reading through journey, its open up your current eyes about the thing that happened in the world which is possibly can be happened around you. It is easy to bring everywhere like in recreation area, café, or even in your means home by train. Should you be having difficulties in bringing the paper book maybe the form of Materials, Design and Manufacturing for Lightweight Vehicles (Woodhead Publishing Series in Composites Science and Engineering) in e-book can be your choice.

Charlsie Sprouse:

This Materials, Design and Manufacturing for Lightweight Vehicles (Woodhead Publishing Series in Composites Science and Engineering) is great e-book for you because the content that is certainly full of information for you who always deal with world and have to make decision every minute. That book reveal it information accurately using great organize word or we can say no rambling sentences inside it. So if you are read the item hurriedly you can have whole information in it. Doesn't mean it only offers you straight forward sentences but tricky core information with attractive delivering sentences. Having Materials, Design and Manufacturing for Lightweight Vehicles (Woodhead Publishing Series in Composites Science and Engineering) in your hand like obtaining the world in your arm, data in it is not ridiculous 1. We can say that no e-book that offer you world within ten or fifteen second right but this publication already do that. So , this really is good reading book. Hello Mr. and Mrs. occupied do you still doubt that?

Walter Feuerstein:

In this era which is the greater man or woman or who has ability to do something more are more special than other. Do you want to become considered one of it? It is just simple solution to have that. What you should do is just spending your time not much but quite enough to enjoy a look at some books. One of several books in the top checklist in your reading list is usually Materials, Design and Manufacturing for Lightweight Vehicles (Woodhead Publishing Series in Composites Science and Engineering). This book and that is qualified as The Hungry Slopes can get you closer in turning out to be precious person. By looking right up and review this reserve you can get many advantages.
