Bioreaction Engineering Principles

John Villadsen, Jens Nielsen, Gunnar Lidén

Bioreaction Engineering Principles John Villadsen, Jens Nielsen, Gunnar Lidén

The present text is a complete revision of the 2nd edition from 2003 of the book with the same title. In recognition of the fast pace at which biotechnology is moving we have rewritten several chapters to include new scientific progress in the field from 2000 to 2010. More important we have changed the focus of the book to support its use, not only in universities, but also as a guide to design new processes and equipment in the bio-industry. A new chapter has been included on the prospects of the bio-refinery to replace many of the oil- and gas based processes for production of especially bulk chemicals. This chapter also serves to make students in Chemical Engineering and in the Bio-Sciences enthusiastic about the whole research field. As in previous editions we hope that the book can be used as textbook for classes, even at the undergraduate level, where chemical engineering students come to work side by side with students from biochemistry and microbiology. To help the chemical engineering students Chapter 1 includes a brief review of the most important parts of microbial metabolism. In our opinion this review is sufficient to understand microbial physiology at a sufficiently high level to profit from the rest of the book. Likewise the bio-students will not be overwhelmed by mathematics, but since the objective of the book is to teach quantitative process analysis and process design at a hands-on level some mathematics and model analysis is needed. We hope that the about 100 detailed examples and text notes, together with many instructive problems will be sufficient to illustrate how model analysis is used, also in Bio-reaction Engineering.

From reader reviews:

Esther Price:

Why don't make it to be your habit? Right now, try to ready your time to do the important take action, like looking for your favorite book and reading a book. Beside you can solve your condition; you can add your knowledge by the e-book entitled Bioreaction Engineering Principles. Try to face the book Bioreaction Engineering Principles as your pal. It means that it can being your friend when you sense alone and beside that of course make you smarter than before. Yeah, it is very fortunated for yourself. The book makes you considerably more confidence because you can know every little thing by the book. So , let's make new experience in addition to knowledge with this book.

Quentin Ryan:

Here thing why that Bioreaction Engineering Principles are different and dependable to be yours. First of all reading a book is good but it depends in the content of computer which is the content is as tasty as food or not. Bioreaction Engineering Principles giving you information deeper including different ways, you can find any guide out there but there is no book that similar with Bioreaction Engineering Principles. It gives you thrill studying journey, its open up your eyes about the thing that will happened in the world which is probably can be happened around you. You can easily bring everywhere like in area, café, or even in your means home by train. In case you are having difficulties in bringing the published book maybe the form of Bioreaction Engineering Principles in e-book can be your alternate.

Mohammed Thomas:

Your reading sixth sense will not betray you actually, why because this Bioreaction Engineering Principles book written by well-known writer who knows well how to make book that can be understand by anyone who have read the book. Written with good manner for you, dripping every ideas and creating skill only for eliminate your own hunger then you still question Bioreaction Engineering Principles as good book not simply by the cover but also by the content. This is one e-book that can break don't determine book by its cover, so do you still needing another sixth sense to pick this kind of!? Oh come on your studying sixth sense already told you so why you have to listening to yet another sixth sense.

Kimberly Casselman:

In this time globalization it is important to someone to find information. The information will make you to definitely understand the condition of the world. The healthiness of the world makes the information much easier to share. You can find a lot of recommendations to get information example: internet, classifieds, book, and soon. You will see that now, a lot of publisher that print many kinds of book. The actual book that recommended to your account is Bioreaction Engineering Principles this book consist a lot of the information with the condition of this world now. That book was represented how does the world has grown up. The terminology styles that writer value to explain it is easy to understand. The actual writer made some

study when he makes this book. That's why this book suited all of you.
