**Advanced surveying and mapping (International textbooks in civil engineering)** George Dewey Whitmore

## **From The Preface:**

The primary purpose of this book is to provide instruction material for a college course covering such subjects as geodetic surveying and mapping, precise surveying in city work, and aerial photogrammetry. In view of the fact that these subjects are considered comparatively difficult, a special effort has been made in the preparation of the book to describe in complete detail the methods of making field measurements and observations and the procedures for performing calculations...
