Coastal-Marine Conservation: Science and Policy

G. Carleton Ray, Jerry McCormick-Ray

Coastal-Marine Conservation: Science and Policy G. Carleton Ray, Jerry McCormick-Ray

Coastal-Marine Conservation: Science and Policy introduces students and managers to complex conservation and management issues facing coastal nations of the world, their citizens, and international and non-governmental organizations. It aims to reduce complexity and inspire a greater consensus for more effective conservation action.

- Presents the coastal realm as a heterogeneous, diverse ecosystem of exceptional high biological diversity and productivity, and where conservation challenges are most difficult and urgent
- Examines the critical issues facing coastal-marine conservation and the mechanisms for dealing with them
- Reviews the basic science required for addressing conservation issues by presenting the coastal realm as a land-sea ecosystem of global significance, and by reviewing the natural-history features of coastal-marine organisms
- Presents three ecologically and latitudinally distinct "real-world" case studies to create a context for understanding of regional systems, their cultures, and their conservation: the polar Bering Sea, the temperate Chesapeake Bay, and the tropical Bahamas
- Makes apparent the ecological stresses on the coastal realm, increasing rates of ecosystem change, loss of ecosystem health, and fragmented governance
- Synthesizes the major challenges for conservation and suggests future policy and management strategies, including ecosystem management and needs for achieving sustainability and addressing the environmental debt

This book is intended for undergraduates and graduates taking courses in coastal and marine conservation and management, as well as those actively engaged in coastal-marine conservation activities, and gives the reader a clear steer to future management approaches.

From reader reviews:

Daniel Guy:

Beside that Coastal-Marine Conservation: Science and Policy in your phone, it can give you a way to get closer to the new knowledge or data. The information and the knowledge you might got here is fresh from oven so don't end up being worry if you feel like an aged people live in narrow community. It is good thing to have Coastal-Marine Conservation: Science and Policy because this book offers for you readable information. Do you sometimes have book but you would not get what it's exactly about. Oh come on, that would not happen if you have this with your hand. The Enjoyable agreement here cannot be questionable, such as treasuring beautiful island. So do you still want to miss it? Find this book and read it from today!

Douglas Wyss:

You can find this Coastal-Marine Conservation: Science and Policy by visit the bookstore or Mall. Merely viewing or reviewing it could possibly to be your solve challenge if you get difficulties for ones knowledge. Kinds of this guide are various. Not only through written or printed but can you enjoy this book by e-book. In the modern era similar to now, you just looking by your mobile phone and searching what their problem. Right now, choose your ways to get more information about your book. It is most important to arrange yourself to make your knowledge are still upgrade. Let's try to choose correct ways for you.

Graham Ayala:

Reserve is one of source of understanding. We can add our understanding from it. Not only for students but native or citizen want book to know the revise information of year for you to year. As we know those publications have many advantages. Beside we all add our knowledge, could also bring us to around the world. By the book Coastal-Marine Conservation: Science and Policy we can have more advantage. Don't someone to be creative people? Being creative person must want to read a book. Just choose the best book that ideal with your aim. Don't be doubt to change your life at this time book Coastal-Marine Conservation: Science and Policy. You can more appealing than now.

Lauren Allison:

Reading a reserve make you to get more knowledge from it. You can take knowledge and information originating from a book. Book is written or printed or descriptive from each source this filled update of news. On this modern era like now, many ways to get information are available for you actually. From media social like newspaper, magazines, science publication, encyclopedia, reference book, novel and comic. You can add your knowledge by that book. Are you ready to spend your spare time to spread out your book? Or just looking for the Coastal-Marine Conservation: Science and Policy when you desired it?
