Issues and Perspectives in Conflict of Laws: Cases and Materials (Carolina Academic Press Law Casebook Series) Gary J. Simson

The newest edition brings the book up to date through December 1996 with significant developments in the courts and in conflicts scholarship. Conflict of Laws 3E also reflects the increasing importance of international conflicts. This edition is accompanied by a teacher's manual. Like the earlier editions, the third features an innovative organization of the choice-of-law materials. After highlighting the natural advantages of applying forum law, Simson examines choice-of-law policies that, at times, have led courts to reject these natural advantages. Professors who have adopted the book have praised this organization for its effectiveness in stimulating debate about both the old and new learning in choice of law. Professors using the book also have expressed enthusiasm about its teachability, and they point to another distinctive feature of the book - its format in introductions and notes - as particularly helpful in this regard. The book does not follow the usual practice of posing in the notes a number of questions tailored to the principal case or cases that come before. Instead, questions of some generality and scope are presented in the introduction to each chapter, and the notes are basically reserved for summaries of relevant cases, excerpts from conflicts scholarship, and other materials shedding light on the issues raised by the principal cases.

A teacher's manual is also available.
