Cutaneous Hematopathology: Approach to the Diagnosis of Atypical Lymphoid-Hematopoietic Infiltrates in Skin

Cutaneous Hematopathology: Approach to the Diagnosis of Atypical Lymphoid-Hematopoietic Infiltrates in Skin

This volume explores the nexus of manifestations of hematopathology and dermatopathology and provides a novel compartmental(epidermal, dermal, subcutaneous) -based framework to approach a diagnosis that considers both pseudolymphomatous and lymphomatous patterns. Through photographs, tables, and text, the book illustrates the range of non-neoplastic hematologic disorders and their neoplastic counterparts in skin: reactive patterns of infectious etiology and immune responses that simulate cutaneous lymphomas. The epidemiology, pathobiology, clinical and immuno-histopathologic manifestations in skin as well as the approach to diagnosis, selection and algorithmic interpretation of tests, and prognosis are also described.

Written by experts in the field, *Cutaneous Hematopathology: Approach to the Diagnosis of Atypical Lymphoid-Hematopoietic Infiltrates in Skin* is a comprehensive resource that is of great value to surgical pathologists, hematopathologists, dermatopathologists, residents and fellows, community dermatologists, oncologists and infectious disease practitioners.
