Earth Observation of Ecosystem Services (Earth Observation of Global Changes)

Earth Observation of Ecosystem Services (Earth Observation of Global Changes)

A balanced review of differing approaches based on remote sensing tools and methods to assess and monitor biodiversity, carbon and water cycles, and the energy balance of terrestrial ecosystem. **Earth Observation of Ecosystem Services** highlights the advantages Earth observation technologies offer for quantifying and monitoring multiple ecosystem functions and services. It provides a multidisciplinary reference that expressly covers the use of remote sensing for quantifying and monitoring multiple ecosystem services.

Rather than exhaustively cover all possible ecosystem services, this book takes a global look at the most relevant remote sensing approaches to estimate key ecosystem services from satellite data. Structured in four main sections, it covers carbon cycle, biodiversity, water cycle, and energy balance. Each section contains a review of conceptual and empirical methods, techniques, and case studies linking remotely sensed data to the biophysical variables and ecosystem functions associated with key ecosystem services.

The book identifies relevant issues and challenges of assessment, presents cutting-edge sensing techniques, uses globally implemented tools to quantify ecosystem functions, and presents examples of successful monitoring programs. Covering recent developments undertaken on the global and national stage from Earth observation satellite data, it includes valuable lessons and recommendations and novel ways to improve current global monitoring systems. The book delineates the use of Earth observation data so that it can be used to quantify, map, value, and manage the valuable goods and services that ecosystems provide to societies around the world.

From reader reviews:

Madeline Williams:

The book Earth Observation of Ecosystem Services (Earth Observation of Global Changes) will bring you to the new experience of reading some sort of book. The author style to spell out the idea is very unique. In the event you try to find new book you just read, this book very ideal to you. The book Earth Observation of Ecosystem Services (Earth Observation of Global Changes) is much recommended to you you just read. You can also get the e-book through the official web site, so you can more easily to read the book.

Charles Ginter:

Reading a book to get new life style in this yr; every people loves to study a book. When you study a book you can get a wide range of benefit. When you read ebooks, you can improve your knowledge, simply because book has a lot of information upon it. The information that you will get depend on what sorts of book that you have read. In order to get information about your examine, you can read education books, but if you want to entertain yourself you can read a fiction books, this kind of us novel, comics, and soon. The Earth Observation of Ecosystem Services (Earth Observation of Global Changes) will give you new experience in examining a book.

Albert Guerra:

Many people spending their time period by playing outside using friends, fun activity together with family or just watching TV the entire day. You can have new activity to invest your whole day by looking at a book. Ugh, ya think reading a book can definitely hard because you have to accept the book everywhere? It fine you can have the e-book, taking everywhere you want in your Touch screen phone. Like Earth Observation of Ecosystem Services (Earth Observation of Global Changes) which is finding the e-book version. So , why not try out this book? Let's observe.

Eddie Barber:

Publication is one of source of knowledge. We can add our information from it. Not only for students but additionally native or citizen require book to know the revise information of year in order to year. As we know those books have many advantages. Beside many of us add our knowledge, may also bring us to around the world. By the book Earth Observation of Ecosystem Services (Earth Observation of Global Changes) we can have more advantage. Don't one to be creative people? To become creative person must love to read a book. Simply choose the best book that acceptable with your aim. Don't be doubt to change your life with that book Earth Observation of Ecosystem Services (Earth Observation of Global Changes). You can more appealing than now.
