Oracle Database Programming using Java and Web Services Kuassi Mensah
The traditional division of labor between the database (which only stores and manages SQL and XML data for fast, easy data search and retrieval) and the application server (which runs application or business logic, and presentation logic) is obsolete. Although the books primary focus is on programming the Oracle Database, the concepts and techniques provided apply to most RDBMS that support Java including Oracle, DB2, Sybase, MySQL, and PostgreSQL. This is the first book to cover new Java, JDBC, SQLJ, JPublisher and Web Services features in Oracle Database 10g Release 2 (the coverage starts with Oracle 9i Release 2). This book is a must-read for database developers audience (DBAs, database applications developers, data architects), Java developers (JDBC, SQLJ, J2EE, and OR Mapping frameworks), and to the emerging Web Services assemblers.

* Describes pragmatic solutions, advanced database applications, as well as provision of a wealth of code samples
* Addresses programming models which run within the database as well as programming models which run in middle-tier or client-tier against the database.
* Discusses languages for stored procedures: when to use proprietary languages such as PL/SQL and when to use standard languages such as Java; also running non-Java scripting languages in the database
* Describes the Java runtime in the Oracle database 10g (i.e., OracleJVM), its architecture, memory management, security management, threading, Java execution, the Native Compiler (i.e., NCOMP), how to make Java known to SQL and PL/SQL, data types mapping, how to call-out to external Web components, EJB components, ERP frameworks, and external databases.
* Describes JDBC programming and the new Oracle JDBC 10g features, its advanced connection services (pooling, failover, load-balancing, and the fast database event notification mechanism) for clustered databases (RAC) in Grid environments.
* Describes SQLJ programming and the latest Oracle SQLJ 10g features , contrasting it with JDBC
* Describes the latest Database Web services features, Web services concepts and Services Oriented Architecture (SOA) for DBA, the database as Web services provider and the database as Web services consumer.
* Abridged coverage of JPublisher 10g, a versatile complement to JDBC, SQLJ and Database Web Services.

From reader reviews:

James Bergeron:

The book Oracle Database Programming using Java and Web Services give you a sense of feeling enjoy for your spare time. You can use to make your capable considerably more increase. Book can for being your best friend when you getting pressure or having big problem with your subject. If you can make reading a book Oracle Database Programming using Java and Web Services to be your habit, you can get far more advantages, like add your personal capable, increase your knowledge about many or all subjects. You can know everything if you like open and read a e-book Oracle Database Programming using Java and Web Services. Kinds of book are a lot of. It means that, science guide or encyclopedia or some others. So , how do you think about this book?

Leslie Bennett:

The book Oracle Database Programming using Java and Web Services can give more knowledge and also the precise product information about everything you want. So just why must we leave a good thing like a book Oracle Database Programming using Java and Web Services? Wide variety you have a different opinion about reserve. But one aim this book can give many information for us. It is absolutely proper. Right now, try to closer using your book. Knowledge or details that you take for that, you may give for each other; it is possible to share all of these. Book Oracle Database Programming using Java and Web Services has simple shape but you know: it has great and big function for you. You can seem the enormous world by start and read a book. So it is very wonderful.

Maryann Warren:

Hey guys, do you desires to finds a new book to learn? May be the book with the concept Oracle Database Programming using Java and Web Services suitable to you? The particular book was written by well known writer in this era. Often the book untitled Oracle Database Programming using Java and Web Servicesis a single of several books which everyone read now. This specific book was inspired lots of people in the world. When you read this reserve you will enter the new dimensions that you ever know ahead of. The author explained their idea in the simple way, therefore all of people can easily to comprehend the core of this book. This book will give you a large amount of information about this world now. To help you to see the represented of the world on this book.

Irma Lovern:

In this particular era which is the greater man or who has ability in doing something more are more treasured than other. Do you want to become one among it? It is just simple solution to have that. What you need to do is just spending your time not very much but quite enough to get a look at some books. One of many books in the top record in your reading list will be Oracle Database Programming using Java and Web Services. This book which is qualified as The Hungry Slopes can get you closer in becoming precious person. By

looking way up and review this book you can get many advantages.
