Winner of the 2006 Alice Davis Hitchcock Award!

The word 'nature' comes from *natura*, Latin for birth - as do the words nation, native and innate. But nature and nation share more than a common root, they share a common history where one term has been used to define the other. In the United States, the relationship between nation and nature has been central to its colonial and post-colonial history, from the idea of the noble savage to the myth of the frontier. Narrated, painted and filmed, American landscapes have been central to the construction of a national identity.

Architecture and Nature presents an in-depth study of how changing ideas of what nature is and what it means for the country have been represented in buildings and landscapes over the past century.
