Helmut Schenkel-Brunner

Human Blood Groups: Chemical and Biochemical Basis of Antigen Specificity Helmut Schenkel-Brunner

This monograph covers the entire field of blood group serology, with its main emphasis on the chemical and biochemical basis of blood group specificity. Full consideration is given to molecular biology investigations, in particular to studies on the structure of blood group genes and the molecular biological basis of alleles and rare blood group variants, whereby relevant literature up to the year 2000 is covered. The text is supplemented by numerous illustrations and tables, and detailed reference lists.
