Social Network Analysis - Community Detection and Evolution (Lecture Notes in Social Networks)

Social Network Analysis - Community Detection and Evolution (Lecture Notes in Social Networks)

This book is devoted to recent progress in social network analysis with a high focus on community detection and evolution. The eleven chapters cover the identification of cohesive groups, core components and key players either in static or dynamic networks of different kinds and levels of heterogeneity. Other important topics in social network analysis such as influential detection and maximization, information propagation, user behavior analysis, as well as network modeling and visualization are also presented. Many studies are validated through real social networks such as Twitter. This edited work will appeal to researchers, practitioners and students interested in the latest developments of social network analysis.

From reader reviews:

Tina Olsen:

Does one one of the book lovers? If so, do you ever feeling doubt while you are in the book store? Try and pick one book that you never know the inside because don't assess book by its cover may doesn't work at this point is difficult job because you are afraid that the inside maybe not while fantastic as in the outside seem likes. Maybe you answer may be Social Network Analysis - Community Detection and Evolution (Lecture Notes in Social Networks) why because the excellent cover that make you consider about the content will not disappoint anyone. The inside or content will be fantastic as the outside or even cover. Your reading sixth sense will directly direct you to pick up this book.

Kellie Smith:

This Social Network Analysis - Community Detection and Evolution (Lecture Notes in Social Networks) is great guide for you because the content which can be full of information for you who have always deal with world and possess to make decision every minute. This book reveal it information accurately using great organize word or we can say no rambling sentences within it. So if you are read that hurriedly you can have whole facts in it. Doesn't mean it only gives you straight forward sentences but challenging core information with beautiful delivering sentences. Having Social Network Analysis - Community Detection and Evolution (Lecture Notes in Social Networks) in your hand like having the world in your arm, data in it is not ridiculous a single. We can say that no book that offer you world within ten or fifteen minute right but this book already do that. So , this is good reading book. Heya Mr. and Mrs. stressful do you still doubt this?

Betty Blake:

With this era which is the greater man or woman or who has ability to do something more are more special than other. Do you want to become considered one of it? It is just simple way to have that. What you must do is just spending your time little but quite enough to get a look at some books. Among the books in the top collection in your reading list is definitely Social Network Analysis - Community Detection and Evolution (Lecture Notes in Social Networks). This book that is qualified as The Hungry Mountains can get you closer in becoming precious person. By looking upwards and review this book you can get many advantages.

Mathew Jones:

As a college student exactly feel bored to be able to reading. If their teacher requested them to go to the library or make summary for some reserve, they are complained. Just very little students that has reading's heart or real their passion. They just do what the professor want, like asked to the library. They go to there but nothing reading significantly. Any students feel that examining is not important, boring in addition to can't see colorful pics on there. Yeah, it is to get complicated. Book is very important for you personally. As we know that on this period, many ways to get whatever we want. Likewise word says, many ways to reach Chinese's country. Therefore , this Social Network Analysis - Community Detection and Evolution (Lecture

Notes in Social Networks) can make you truly feel more interested to read.
