**"This is an insightful book that will please anyone interested in midcentury American history and politics. Anyone serious about political philosophy will learn from it. Highly recommended.†? -Library Journal (starred review)**

William F. Buckley Jr. was the foremost architect of the conservative movement that transformed American politics between the 1960s and the end of the century. When Buckley launched *National Review* in 1955, conservatism was a beleaguered, fringe segment of the Republican Party. Three decades later Ronald Reagan—who credited *National Review* with shaping his beliefs—was in the White House. Buckley and his allies devised a new-model conservatism that replaced traditional ideals of Edmund Burke with a passionate belief in the free market; religious faith; and an aggressive stance on foreign policy.

Buckley's TV show, *Firing Line*, and his campaign for mayor of New York City made him a celebrity; his wit and zest for combat made conservatism fun. But Buckley was far more than a controversialist. Deploying his uncommon charm, shrewdly recruiting allies, quashing ideological competitors, and refusing to compromise on core principles, he almost single-handedly transformed conservatism from a set of retrograde attitudes into a revolutionary force.
