Environmental Physiology of Plants

Alastair H. Fitter, Robert K.M. Hay

Environmental Physiology of Plants Alastair H. Fitter, Robert K.M. Hay

This is the third edition of an established and successful university textbook. The original structure and philosophy of the book continue in this new edition, providing a genuine synthesis of modern ecological and physiological thinking, while entirely updating the detailed content. New features include a fresh, unified treatment of toxicity, emphasizing common features of plant response to ionic, gaseous, and other toxins, explicit treatment of issues relating to global change, and a section on the role of fire in plant physiology and communities. The illustrations in the text are improved over previous editions, including color plates for the first time, and the authors' continuing commitment to providing wide citation of the relevant literature has further improved the reference list. This revision of **Environmental Physiology of Plants** will ensure the reputation of this title as a useful and relevant text well into the 21st century.

Key Features

- * Includes enhanced illustrations, now with color plates
- * Examines new molecular approaches which can be harnessed to solve problems in physiology
- * Features new topics such as the unified treatment of toxicity, an explicit treatment of the issues relating to global change, and a section on the role of fire
