Clinical Management of Children's Voice Disorders

Christopher Hartnick, Mark Boseley

Clinical Management of Children's Voice Disorders Christopher Hartnick, Mark Boseley

Written for SLPs who care for children with vocal disorders, this is the second book by the team who wrote *Pediatric Voice Disorders*. This new publication is specially designed for SLPs to have access to the medical information at a special price. To that end, certain chapters have been removed from *Pediatric Voice Disorders*, which focuses on the techniques of surgical care, and other chapters have been reshaped to highlight issues of office based diagnosis and intervention. Several new chapters have been added, including a fascinating and comprehensive chapter by Katherine Verdolini which reviews the literature regarding voice therapy in children as well as an additional chapter on the work-up and treatment of children with Velopharyngeal Insufficiency. The authors have provided a cross-fertilization of thoughts and ideas that comes from putting together a seemingly diverse group of specialists and having them focus on specific pediatric disease-based and pediatric voice pathology-based topics. Within this book, members of each specialty attend to these questions and comment upon how the specialties can best work together towards obtaining diagnoses and rendering unified and comprehensive treatment.
