Fluid Sterilization by Filtration Peter R. Johnston

Completely revised and updated, Fluid Sterilization by Filtration, Third Edition discusses the use of gas and fluid filtration systems in sterilization technology. Packed with information useful to both the novice and the expert, it includes line-drawing illustrations, filtration setups, and plots of math functions illustrating fluid flows through filter media built from a random packing of solids. The book provides in-depth discussions of general filtration, specific membranes used in filtration, integrity testing, earlier filtration steps, and cross-flow filtration. It also includes a useful, updated appendix of worldwide contacts and many sources for equipment, supplies, and information.
