# Shape Analysis in Medical Image Analysis: 14 (Lecture Notes in Computational Vision and Biomechanics)

## Shape Analysis in Medical Image Analysis: 14 (Lecture Notes in Computational Vision and Biomechanics)

This book contains thirteen contributions from invited experts of international recognition addressing important issues in shape analysis in medical image analysis, including techniques for image segmentation, registration, modelling and classification and applications in biology, as well as in cardiac, brain, spine, chest, lung and clinical practice.

This volume treats topics such as for example, anatomic and functional shape representation and matching; shape-based medical image segmentation; shape registration; statistical shape analysis; shape deformation; shape-based abnormality detection; shape tracking and longitudinal shape analysis; machine learning for shape modeling and analysis; shape-based computer-aided-diagnosis; shape-based medical navigation; benchmark and validation of shape representation, analysis and modeling algorithms.

This work will be of interest to researchers, students and manufacturers in the fields of artificial intelligence, bioengineering, biomechanics, computational mechanics, computational vision, computer sciences, human motion, mathematics, medical imaging, medicine, pattern recognition and physics.

### **From reader reviews:**

#### **Erica Logan:**

In this 21st hundred years, people become competitive in each and every way. By being competitive today, people have do something to make them survives, being in the middle of typically the crowded place and notice by means of surrounding. One thing that sometimes many people have underestimated this for a while is reading. Yep, by reading a e-book your ability to survive boost then having chance to endure than other is high. For you who want to start reading any book, we give you this Shape Analysis in Medical Image Analysis: 14 (Lecture Notes in Computational Vision and Biomechanics) book as nice and daily reading e-book. Why, because this book is greater than just a book.

#### **Helen Johnson:**

People live in this new morning of lifestyle always try and and must have the spare time or they will get large amount of stress from both lifestyle and work. So , whenever we ask do people have spare time, we will say absolutely indeed. People is human not a robot. Then we consult again, what kind of activity are there when the spare time coming to a person of course your answer will probably unlimited right. Then do you try this one, reading textbooks. It can be your alternative with spending your spare time, the book you have read will be Shape Analysis in Medical Image Analysis: 14 (Lecture Notes in Computational Vision and Biomechanics).

#### **Margaret Honig:**

Are you kind of stressful person, only have 10 or even 15 minute in your time to upgrading your mind talent or thinking skill even analytical thinking? Then you are receiving problem with the book compared to can satisfy your small amount of time to read it because this time you only find book that need more time to be read. Shape Analysis in Medical Image Analysis: 14 (Lecture Notes in Computational Vision and Biomechanics) can be your answer given it can be read by a person who have those short spare time problems.

#### **Aaron Tolleson:**

The book untitled Shape Analysis in Medical Image Analysis: 14 (Lecture Notes in Computational Vision and Biomechanics) contain a lot of information on the item. The writer explains your ex idea with easy method. The language is very clear and understandable all the people, so do not worry, you can easy to read that. The book was compiled by famous author. The author will bring you in the new time of literary works. It is easy to read this book because you can continue reading your smart phone, or product, so you can read the book inside anywhere and anytime. If you want to buy the e-book, you can wide open their official website as well as order it. Have a nice go through.
