Embedded Linux System Design and Development P. Raghavan, Amol Lad, Sriram Neelakandan

Based upon the authors' experience in designing and deploying an embedded Linux system with a variety of applications, Embedded Linux System Design and Development contains a full embedded Linux system development roadmap for systems architects and software programmers. Explaining the issues that arise out of the use of Linux in embedded systems, the book facilitates movement to embedded Linux from traditional real-time operating systems, and describes the system design model containing embedded Linux.

This book delivers practical solutions for writing, debugging, and profiling applications and drivers in embedded Linux, and for understanding Linux BSP architecture. It enables you to understand: various drivers such as serial, I2C and USB gadgets; uClinux architecture and its programming model; and the embedded Linux graphics subsystem. The text also promotes learning of methods to reduce system boot time, optimize memory and storage, and find memory leaks and corruption in applications.

This volume benefits IT managers in planning to choose an embedded Linux distribution and in creating a roadmap for OS transition. It also describes the application of the Linux licensing model in commercial products.

From reader reviews:

Rhonda Robitaille:

Have you spare time for the day? What do you do when you have more or little spare time? Yeah, you can choose the suitable activity for spend your time. Any person spent their spare time to take a wander, shopping, or went to the particular Mall. How about open as well as read a book entitled Embedded Linux System Design and Development? Maybe it is to get best activity for you. You realize beside you can spend your time together with your favorite's book, you can more intelligent than before. Do you agree with it is opinion or you have various other opinion?

Tim Travers:

This Embedded Linux System Design and Development is great guide for you because the content which can be full of information for you who always deal with world and still have to make decision every minute. This specific book reveal it details accurately using great arrange word or we can declare no rambling sentences included. So if you are read the idea hurriedly you can have whole facts in it. Doesn't mean it only gives you straight forward sentences but tricky core information with splendid delivering sentences. Having Embedded Linux System Design and Development in your hand like having the world in your arm, facts in it is not ridiculous a single. We can say that no reserve that offer you world inside ten or fifteen minute right but this guide already do that. So , this is good reading book. Hey there Mr. and Mrs. busy do you still doubt that?

Richard Reardon:

In this era globalization it is important to someone to obtain information. The information will make a professional understand the condition of the world. The fitness of the world makes the information simpler to share. You can find a lot of sources to get information example: internet, classifieds, book, and soon. You will see that now, a lot of publisher that will print many kinds of book. The particular book that recommended to you personally is Embedded Linux System Design and Development this book consist a lot of the information on the condition of this world now. This particular book was represented how can the world has grown up. The dialect styles that writer make usage of to explain it is easy to understand. Often the writer made some study when he makes this book. Honestly, that is why this book appropriate all of you.

Debra Brunette:

Don't be worry should you be afraid that this book can filled the space in your house, you might have it in e-book method, more simple and reachable. This specific Embedded Linux System Design and Development can give you a lot of buddies because by you checking out this one book you have issue that they don't and make you actually more like an interesting person. This specific book can be one of a step for you to get success. This reserve offer you information that might be your friend doesn't understand, by knowing more than other make you to be great persons. So , why hesitate? Let's have Embedded Linux System Design and Development.
